

# Start 2026 With Lower Energy Costs

Outdated lighting drains budgets and reduces efficiency. IKIO helps you stop energy waste quickly with high-performance, federally compliant LED upgrades that deliver immediate savings.

## The Immediate Benefits:

40-70% Energy Reduction

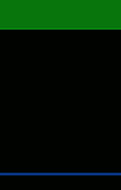

Brighter, Safer Learning & Hospitality Environments

Long-Life, Low-Maintenance Systems

Fully BAA / BABA / DLC Compliant

Ready For 2026 Rebates & Grant Programs

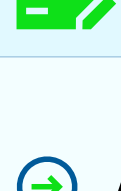

## End energy waste before it rolls into the New Year

Energy inefficiencies quietly grow into large budget losses.

IKIO identifies the hidden costs inside your building and replaces them with long-term savings through modernized lighting systems built for schools and high-traffic facilities.

## Complimentary Pre-Assessment + Funding support

### What the Pre-Assessment Gives You

- A preliminary review of your facility's energy performance.
- A clear estimate of potential lighting and HVAC savings
- Guidance on what areas qualify for rebates & grants
- Eligibility check for a full Energy Savings Assessment
- Access to our Indiana university engineering partnership, where local engineering students gain hands-on experience through the program

### Why It Matters

- You get clarity and real numbers before making any decision while supporting the next generation of engineers through a university-backed initiative.
- Engineering students gain hands-on experience through the program

## Proven Results That Speak For Themselves

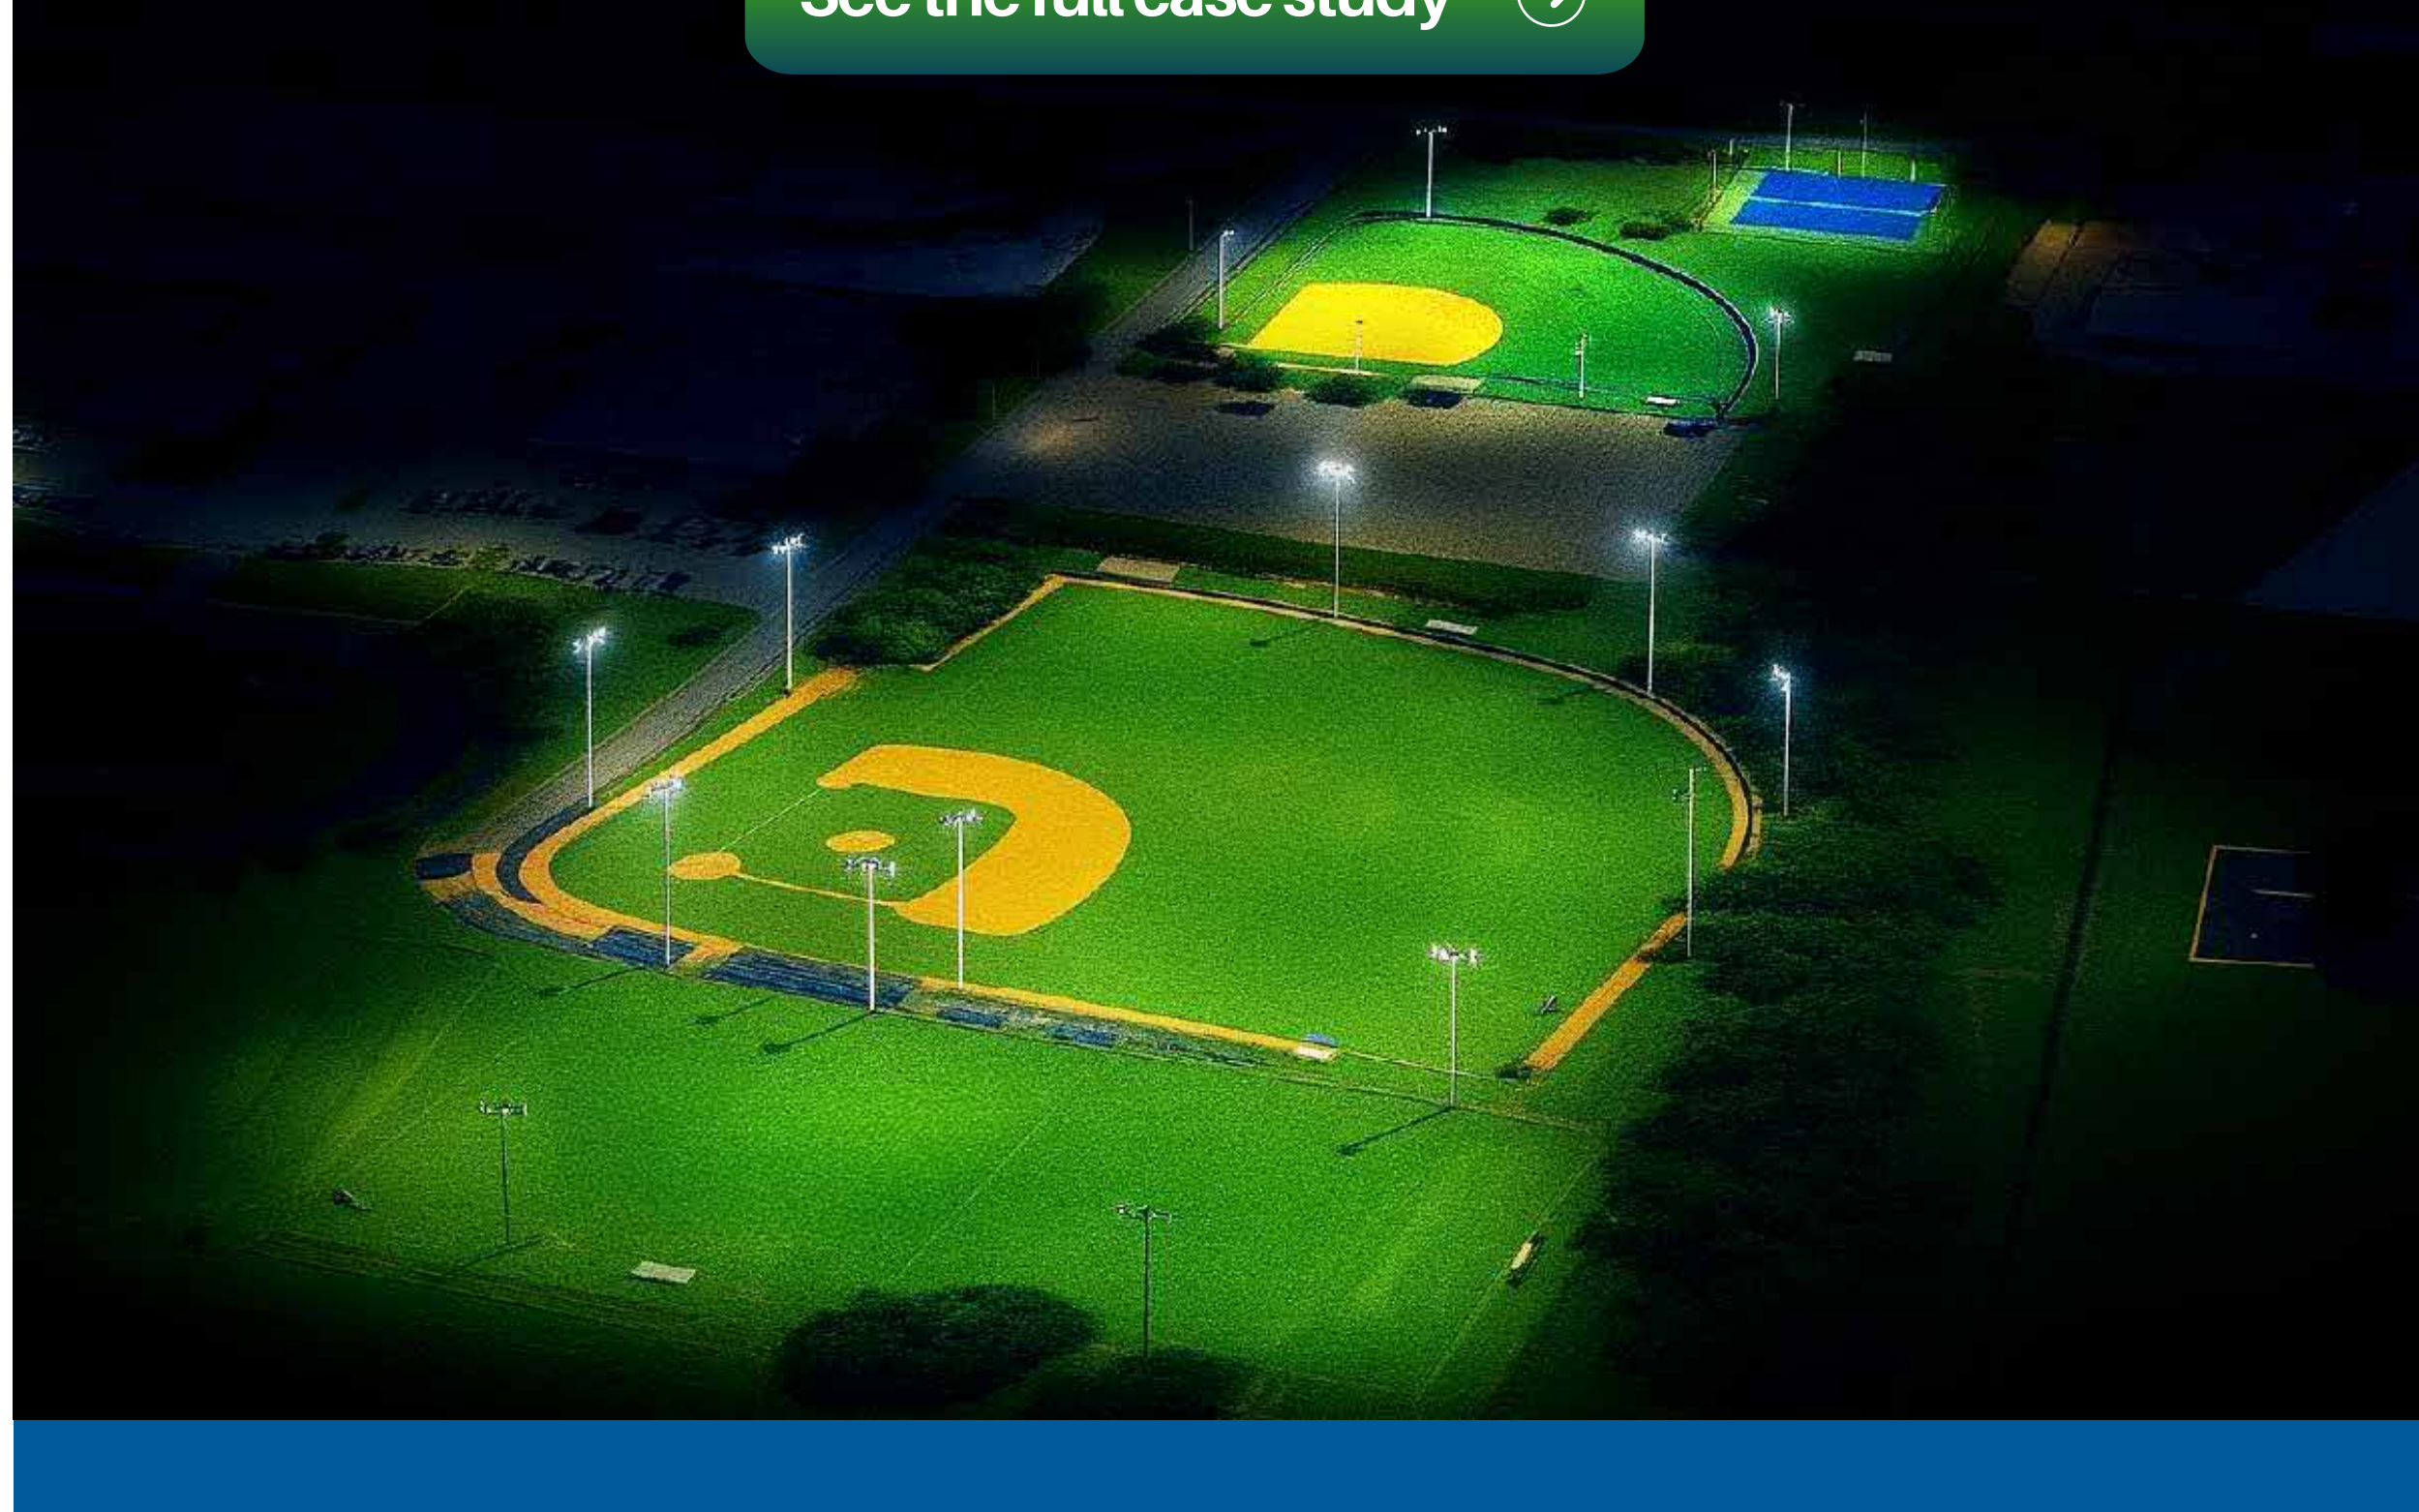

### Lighting That Redefined Game Nights

Bolton High School upgraded its baseball, soccer, and tennis facilities with IKIO's 750W LED athletic system designed for higher visibility, energy efficiency, and long-term reliability.

#### Results at a Glance:

- ✓ **129** Fixtures installed across athletic and parking zones
- ✓ **22,400+ kWh** Saved annually
- ✓ **\$16,400+** Yearly savings
- ✓ **41%** Improvement in lighting levels
