## A Proven Solution for Schools to Support Struggling Readers

Neuralign is an **evidence-based** corrective learning program designed to help students overcome reading and learning challenges, including dyslexia. Our scalable, data-driven approach provides schools with the tools to **enhance literacy outcomes** and support diverse learners effectively.

### WHY SCHOOLS CHOOSE NEURALIGN

#### Personalized & Adaptive

Tailored learning experiences meet the unique needs of each student.

#### Engaging & Effective

Interactive exercises keep students motivated and improving.

#### Real-Time Progress Tracking

Actionable insights help educators monitor student success.

#### Seamless Classroom Integration

Works alongside existing curricula and intervention programs.

#### Research-Based & Proven

Trusted by schools to deliver measurable literacy gains.

# 1 in 5 STUDENTS

**Struggle with reading due to dyslexia or related language-based challenges.**

This represents a **\$6 billion** unmet intervention market for an estimated **5.5 million** learners who need structured literacy support beyond existing tools.
