

FMX MONTHLY

April Newsletter

Upcoming events, helpful resources, and the latest updates from our team to keep you in the loop.

They say April showers bring May flowers, but at FMX, we're skipping the rain and going straight to the growth. This month is all about momentum.

We're hitting the road for our Regional Resilience Forums, sharing recently released updates to FMX over the last quarter and bringing you a new guide on integrations and IoT.

Whether you're looking to level up your PM strategy with our assessment or want to master the art of facility scheduling at our upcoming Virtual Roadshow, we've got the tools to help you spring forward.

Dive in below to see what's blooming at FMX this month!

Product Updates

Q1 Feature Highlights

We've kicked off 2026 with a variety of new updates including the launch of our brand new product, Utility Manager! These enhancements are designed to centralize your data, automate manual tasks, and provide clearer insights into your facility's future.

Here are the key callouts from our releases this quarter:

- **FMX Utility Manager:** A brand-new product designed to help organizations centralize utility billing data, automate bill entry, and generate insights that improve facility performance and reduce costs.
- **FMX Iris Enhancements:** Leverage our evolving AI agent to find data, manage work requests, and perform bulk actions using simple, natural language commands.
- **Work Manager Upgrades:** Simplify your daily operations with drag-and-drop task rebalancing in Board View and enhanced control over SLA metrics and priority levels.
- **Capital Planner Projections:** Forecast more accurately by applying global inflation rates to future equipment replacements and capital projects.
- **Public Calendar Privacy:** Secure your public-facing schedules with new controls that hide sensitive internal details while displaying essential event information to the community.
- **Veracross Integration:** Experience deeper synchronization and more flexible configuration for athletic and academic scheduling via the new API Version 3

Resources & Reads

How Does Your PM Strategy Stack Up?

Is your maintenance team playing catch-up, or are you ahead of the curve? Take our Preventive Maintenance Assessment to find out exactly where your organization stands.

In just 8 quick questions, you can:

- **Identify Priorities:** Pinpoint the most critical gaps in your current processes.
- **Get Expert Feedback:** Receive tailored suggestions to improve your PM execution.
- **Benchmark Your Success:** See your unique PM score and see how you compare to other industry leaders.

Stop guessing and start optimizing with data-driven insights and best practices.

Connectivity = Visibility.

When your systems don't talk to each other, your team spends more time transferring data than actually maintaining assets. We've just released a new guide on leveraging Integrations and IoT to create a truly connected facility ecosystem.

Inside the guide, we break down:

- How to eliminate double-entry between FMX and your accounting or SSO tools.
- Using IoT sensors to trigger "condition-based" maintenance automatically.
- Real-world success stories (like how Teays Valley Schools automated humidity alerts).
